HCBC is geo-referencing the trails in our database! We need your help. Using tracks recorded by trail riders, along with their comments on conditions, changes and attributes, we can provide information that riders can count on.

To make the maps, we need the tracks! We'll loan you a Garmin GPSMAP 64st to help us get the job done. The kit contains GPS receiver, rechargeable batteries with charger unit, and complete instructions for use.

BOOK OF THE MONTH

The Essential Hoof

By Susan Kauffmann and Christina Cline

The complete modern guide to horse feet.

The equine hoof is a complex marvel of natural engineering, built to withstand tremendous forces and able to adapt to an astonishing range of environmental conditions. It also changes daily—for better or for worse—in response to external and internal factors. Few horse owners have the opportunity to acquire a deep understanding of the hoof, which limits their ability to advocate on their horses' behalf and make informed decisions about hoof care and management.
