You can tell if a horse is cold by feeling behind their ears.

Did You Know?

A boy horse is called a gelding and a girl horse is called a mare.

Did You Know?

Horses grow thicker fur in the winter to keep warm?

How to Make Your Chatterbox:
1. Cut out the coloured box above along this ⬆ black line.
2. Fold the paper in half from side to side. Crease the fold well, then unfold the paper.
3. Fold the paper in half from top to bottom. Crease the fold well, then unfold the paper.
4. Fold each corner of the square toward the center, so that the points meet in the center and the edges of each folded corner line up with the creases in the paper. Crease the paper well.
5. Turn the paper over. Fold each corner toward the center again, so that the points meet in the center. The paper may be more difficult to fold this time, since it's twice as thick, so make sure to crease the paper firmly.
6. Fold the paper in half to make a rectangle. (It doesn't matter if you fold from top to bottom or side to side.) Fold the paper in half again to make a square. Crease the paper, then unfold these two folds.
7. Insert your finger one of the folded corners of the paper and gently pull up to fluff the paper out. Do the same for the other three corners.
8. Insert one finger or thumb in each of the corners. Bring your fingers and thumb together so that the paper chatterbox becomes three dimensional. Use your other hand to push the center of the paper inward on the other side, if needed.
