DISASTER PREPAREDNESS GUIDELINES FOR HORSE OWNERS

Plan, Plan, and Plan! Failure to plan is planning to fail

This old saying could not be truer when it comes to disaster preparedness and horse owners. In British Columbia there is not a government or disaster agency responsible for the evacuation, transportation and temporary stabling of horses during large-scale incidents. This makes horse owners completely responsible for taking care of their horses. In the case of impending floods, horse owners may have advance notice, so are thereby even more responsible for pre-planning. Horse Council BC has developed this set of guidelines to help horse owners prepare for the worst. When a flood, earthquake, fire or man-made emergency strikes, the steps you have taken ahead of time to protect the safety and well being of your animals can mean the difference between life and death.

It is impossible to cover all situations, and the recommendations covered here may not be suitable for all situations. The information herein is drawn from experiences with past major disasters.

These general guidelines are recommendations intended to help the horse owner prepare for most disasters. Your personal preparedness for yourself, your family and your home is not covered in this publication.

Horse Council BC gratefully acknowledges the financial support of the Province of British Columbia

Long Range Planning

- Familiarize yourself with the types of disasters that could occur in your area. Develop a written plan of action for each. Keep the plan with your important papers. Review the Disaster Plan regularly with everyone involved. Post emergency numbers and your address in a visible location in the stable or barn.
- Survey your property for the best location for animal confinement for each type of disaster. Identify food and water sources that do not rely on electricity which could be lost during an emergency.
- Decide where to take the horses if evacuation becomes necessary.
- Get to know your neighbours, reach out to your surrounding neighbours and local fire department to develop a plan before an emergency.
- Photograph the left and right sides of each horse as well as its face and medial and lateral lower legs. Also take a photo of your horse and make sure you are in the picture. This will help with identifying the horse when picking it up from evacuation.
- Record its breed, sex, age and color. Keep copies with important papers. As an option you can permanently identify your horses by tattoo, brand or microchip. Temporary identification by tags on the fetlocks and halters, painted or etched hooves, or even clipping an ID number onto the horse are also options.
- Have all your horses' records (registration papers, worming, breeding, shots, insurance papers) written down and copied. Keep copies with your important papers as well as with your disaster plan. Put one set in a zip-lock bag. (More on this further in guideline.) You can also keep this information on your computer or a USB stick. Keep a copy for yourself and put one in the zip-lock bag, as well as with your important papers.
- Keep vaccinations and boosters up to date.
- If your horse is on medication, keep extra on hand. Record the dates, dosages and types of medications/health products the animal receives. Record daily dosages and dietary requirements. Keep copies of this with your important papers and separate disaster plans.
- If you own a horse trailer or van, make sure it is insured and in good condition. Check it for safety. Make sure that the truck you will tow it with is also insured and in good running order. Keep the gas tank full and keep spare gas on hand.
- Make sure your horse will load! Practice, practice and then practice some more. The trailer will do no good if you can't get the horse in.
- Maintain a stockpile of hay and grain- minimum of three days. Keep extra medications and veterinary supplies. Consider keeping tranquilizers should a horse become panicked during a crisis; ask your veterinarian what is available.

Advanced Planning

- Have a halter and lead rope designated for EACH horse and hang it on the wall outside its stall or on the paddock gates.
- Gather and keep extra feed buckets at your barn. These can be sent with the horse when evacuated.
- Always stockpile at least three or more days of feed and hay and bedding. Stockpile medications and supplements. Store extra water in large containers, like rubber garbage bins.
- Keep food and medications in an airtight, waterproof container. Rotate this once every three months.
- Keep pitchforks and shovels in a consistent space with easy access. If space allows an extra wheelbarrow will be helpful.
- Make and keep some sort of ID tags handy for your horses. Luggage tags or dog tags will work. These can be attached to the halters or braided into manes and tails. Keep these with your disaster preparedness kit, or on designated 'evacuation halters'.
- Clearly identify for volunteers which horses should be evacuated first, in the event that all animals cannot be moved. Make sure all personnel are aware of your wishes.
- Compile a portable First Aid Kit. Keep this with your disaster preparedness kit.
- Obtain a map of your area and the area you will evacuate your horse to. Familiarize yourself with the area that the evacuation barn is in. Learn the routes. Keep this map with you disaster preparedness kit. Check out the barn you hope to evacuate to in order to make sure that it is suitable.
- Write down all the emergency phone numbers; put this in your disaster preparedness kit.
- Check to make sure all your advance preplanning is still valid.

Prior to Evacuation

- Get a Zip-lock bag and put in the copies of your horses registration papers, insurance papers, the photographs you have taken, copies of the Identification papers (copies in this guideline), Fill out an index card with your name, address, horses name and description and your vet's name and phone number. Also add any feeding instructions and special needs. Wrap this around the horse's halter with duct tape. Do not put original registration papers in the bag. Write "copy" across the papers. Remember, during an emergency everyone is not honest.
- Put luggage (or similar type) tags with the same information as on index card and braid it into the horse's mane. Do the same in the tail. Do not tie around the tail.
- If your horse is not permanently identified with a microchip or brand, now may be the time to use small animal clippers and clip your phone number onto your horse's neck, or use spray paint (body only) , livestock chalk or etch the hooves. Choose a unique semi permanent identifier and take a picture of it especially if your horse is being trailered by someone other than you to the evacuation site.
- Pack into your trailer, or put aside, all the extra buckets, feed and hay that you have stockpiled for your horse's evacuation. Do not forget the portable first aid kit.
- Transport or prepare to transport your horse to a safe evacuation site. It is best to do this before it is an emergency, even several days in advance.

Do not wait until the last minute to remove your animals.

- Write down and keep in a safe place, the address of where your horse has been evacuated.
- If you are unable or unwilling to remove your horse, make sure all the preparations to keep them on the property are in place. Make sure that someone knows you are on the property and have your horse with you.
- If you are staying with your horse on the property, take two plywood boards and spray paint on one side of the board "Have Horses, need help!", On the other side of the board, spray paint "Have horses, OK for now". Keep these in the barn or near the house. Use them to keep rescue and emergency personnel informed should communication line be severed.

Portable Veterinary Supply Kit (keep in waterproof container)

- Cotton
- Bandages
- Thermometer
- Scissors
- Vet wrap
- Poultice
- Surgical soap
- Fly Spray
- Electrolytes
- Iodine
- Wound Ointment
- Peroxide
- Gauze pads
- Vaseline
- Extra supply of special Medicines
- Veterinarian's name and telephone number
- Emergency contact
- Horses Dietary needs

Notes:

If you are not hauling your own horses, it is important to have some way of proving the horses belong to you when you can be reunited. You can use a Zip-Lock Horse ID Bag (to be attached to horses' halter). You can also use a digital camera or smart phone to take pictures of your horses with the person hauling them and the haulers license plate.

- Photograph of horse right and left sides, face, legs.
- Photograph of horse and owner
- Copies of registration papers
- Veterinary records
- Index card with owner's name, address, telephone number, feeding instructions, horse's name and description. Back up USB sticks can also be put in here.
- Insurance documents for the horse (if insured)
- Duct tape to attach bag to halter.
- Emergency Evacuation Transport documentation papers (signed by owner and volunteer transport person) these will be filled out and signed at the time the horse is being evacuated.
- Filled out Evacuation ID papers
- Veterinarian's name and telephone number

Notes:

Personal Emergency Kit

- Flashlight with extra batteries
- Portable radio with extra batteries
- Wire cutters
- First aid kit for humans
- Tool kit with hammer, nails, saw, screws etc.
- Chain saw
- Tarps
- Plywood and spray paint
- Axe
- Matches
- Gasoline
- 2 liter pop bottles (full of frozen water)
- Bleach
- Cell phone
- Sharp knife
- Maps
- Vet's name and telephone number
- Emergency phone numbers (Fire, Police, Ambulance)
- Ropes
- Blankets

Notes:

Feed and Supply Kit

- At least 3 days supply of grain in airtight container
- At least 3 days supply of hay in garbage/plastic bags
- At least 3 day supply of special feed supplements
- Portable water containers
- Wheelbarrow
- Pitchfork
- Shovels
- Bagged shavings
- Horse Blankets
- Leather Halter

Emergency Disaster Kit

- Copies of everything in the Zip-Lock ID bag
- First Aid kit
- Personal Emergency Kit
- Feed and Supply Kit
- Written Plan of Action

Notes:

Equine Evacuation Documentation Form

Date: _____

Horses Name: _____

Description; (also please fill out form below) _____

Owners Name: _____

Owners Address: _____

Owners Telephone Number: _____ Owners Signature: _____

Location Horse Picked up from: _____

Location Horse Delivered to: _____
